Our Goal

Being former high school students as well as current college students, we understand how hard it can be for a student without the proper tools. We have created the tools that we would have wanted while we were in high school. We hope for Curveu to turn into a vast system where any student can easily create an application that can help improve the ways in which they learn.

What We Do

Curveu aims to be a platform for users to develop educational tools that help them succeed in middle school, high school, or college and beyond. All a student or parent has to do is sign up and enter their system's username and password.

Find us on the App Store!

The Founders

Daniel

With a background in software engineering, Daniel programmed the Curveu site. This includes everything you see, as well as, the work happening behind the scenes. Prior to Curveu, the San Jose Mercury News recognized him for his IC Connector application that changed the way students thought about their education on the go.

Doug

Doug handles all graphic features of Curveu. This includes all of the button styles, navigation bars, and text styles. Not only can Doug design, but he also has a knack for business. He handles all business aspects of Curveu. Without him, Curveu would look like plain text and we would have no business model. Prior to Curveu, Doug worked on designing IC Connector.

Curveu

Improve your education

Curveu Inc.

How We Do It

Curveu uses the available APIs that most Student Information Systems offer. We are able to bring all the student's data that is available from their respective system directly into Curveu via their system's username and password.
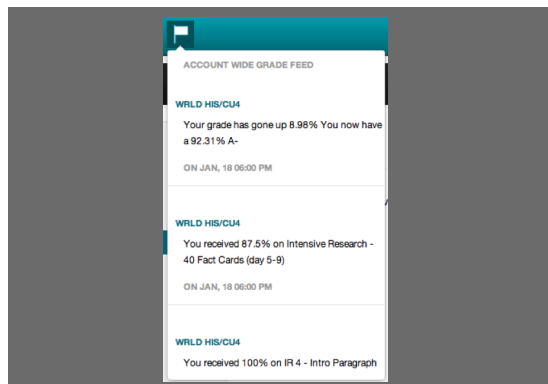

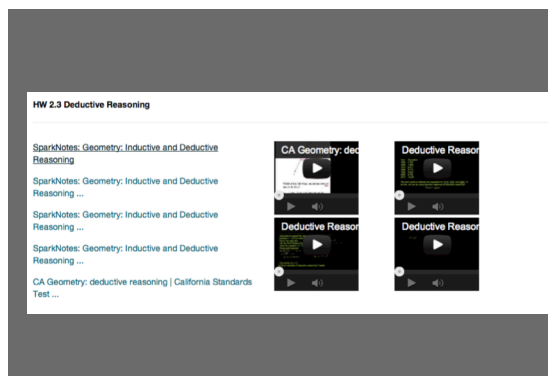

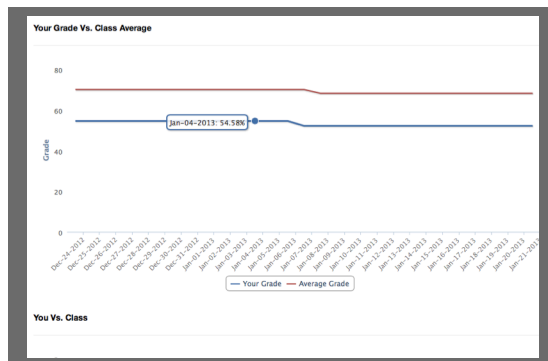

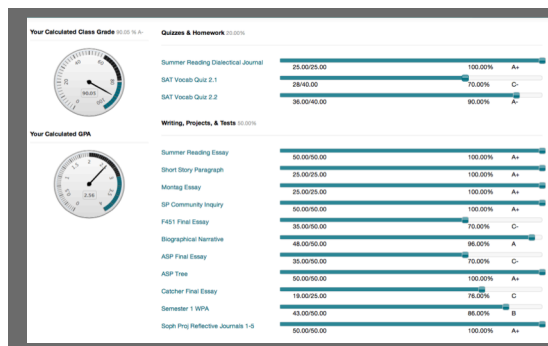

Our Unique Features

- Use our grade calculator
- Collaborate with classmates and teachers
- Determine your GPA
- View the distribution of grades by class and assignment
- Search for relevant information on a specific assignment

Networking

Help support us and receive updates by following us on the web!

What makes us different?

The Calculator tool allows a student to calculate what they need to get on an assignment to improve their grade. It also allows a student to see what would happen if they were to get a different grade on an assignment.

The Statistics tool allows a student to see where they place in their classes in relation to their classmates. The more students in the class that use Curveu, the more statistics that you will see.

With Suggestions, Curveu provides the student with a specialized Google and Khan Academy search that uses the course's title. Eventually, other sites and suggestions will appear here.

With Notifications, a student will stay up-to-date on what happens in their classes. The student can choose to receive an email every three days, seven days, or every day.

"Excellent application to communicate with teachers and peers." – Curveu user
